

Disinfection/Sanitation:

TO DISINFECT HARD NON-POROUS SURFACES: For disinfecting pre-cleaned hard non-porous surfaces apply VITAL OXIDE undiluted full strength to pre-cleaned hard non-porous surfaces, wetting thoroughly with spray, sponge, mop, or by immersion in solution. Allow surfaces to remain wet for 5 minutes for virus inactivation - 10 minutes for bacteria disinfection. For immersion replace solution daily, or more frequently if it becomes significantly soiled or diluted.

TO SANITIZE FOOD CONTACT SURFACES: Staphylococcus aureus (ATCC 6538) and Escherichia coli (ATCC 11229) 99.999% sanitization of food contact surfaces. Mix 1 part product to 9 parts tap water. For glassware, utensils, cookware, and dishware: Scrape and pre-wash, then wash with a good detergent. Rinse with potable water, then sanitize by immersion in product for 1 minute (or longer if specified by government sanitary code). Place on a rack or drain board to air dry. Do not rinse or wipe. Food Contact Immobile Surfaces: (food processing equipment, counter tops, tables, appliances) Remove all gross food particles and soil by cleaning and rinse with potable water. Apply VITAL OXIDE by wetting thoroughly and let stand for 1 minute (or longer if specified by government sanitary code). Let surfaces drain and air dry. Do not rinse or wipe.

TO SANITIZE NON-FOOD CONTACT HARD NON-POROUS SURFACES: Staphylococcus aureus (ATCC 6538) and Enterobacter aerogenes (ATCC 13048) Mix 1 part VITAL OXIDE with 9 parts water. Apply VITAL OXIDE as a one step cleaner sanitizer (5% organic soil load) by wetting thoroughly and let stand 5 minutes., wipe and allow to air dry. No rinse required.

TO SANITIZE SOFT SURFACES: [Fabrics, upholstery, bedding & curtains] Mix 1 part VITAL OXIDE to 5 parts water. Spray 6" - 8" from surface until fabric is wet. DO NOT SATURATE. DO NOT RUB. Let stand for 5 minutes. Allow to air dry. For difficult odors or heavy fabrics, repeat application. Heavy soil must be removed prior to sanitizing.

TO SANITIZE CARPET: For synthetic carpet fibers such as nylon, olefin, or polypropylene – [not intended for use on wool carpets]. Test for color fastness in an inconspicuous area. Carpet should be clean or free of excessive soil before applying. Mix 1 part VITAL OXIDE to 5 parts water. Or use full strength. Apply at a rate of 2.5 oz per sq. ft. product must come into contact with contaminate to work. Allow to dwell for 10 minutes. Do not rinse, use an extraction wand and dry stroke carpet to remove excess moisture. Carpet can air dry or fans may be used if carpet needs to dry faster. To spot clean & sanitize: Spray a light even coating on soiled area until wet. Allow to remain wet for 60 minutes. Gently blot area with a clean, damp, color-safe cloth. DO NOT RUB. Repeat as needed for stubborn stains. Let air dry.

TO SANITIZE CARPET USING A DEVICE: See Manufacturer's Instructions for Use.

FUNGICIDE: To Kill Fungus on hard, non-porous surfaces: Remove as much surface dirt, mold, or mildew as possible by cleaning. Apply full strength VITAL OXIDE to the surface until thoroughly wet for 10 minutes. Re-apply when cleaning or when new growth appears. For effective control of the fungus Trichophyton mentagrophytes, the surface must be completely wet with product for 10 minutes.

MILDEWSTAT: To Prevent Mold or Mildew on Floors, Walls, Ceilings & Fabric: Remove as much surface dirt, mold, or mildew as possible by cleaning. Then spray on VITAL OXIDE from a distance of 12 inches until visibly wet and let air dry, the surface must be completely wet with product for 10 minutes.

Odor Removal:

TO DEODORIZE: VITAL OXIDE works by oxidation, not by masking of odors. Eliminates odors caused by fire smoke, tobacco smoke, musty odors, stale-cooking odors. Simply spray, fog, or wipe on full strength and let air dry to provide long lasting residual deodorizing action. When fogging to deodorize apply 1 quart per 2000 cubic ft. following fogger manufacturer's directions for use.

TO DEODORIZE OR FRESHEN CARPET: For pet urine stains in carpet, blot urine as dry as possible then saturate stain with VITAL OXIDE through carpet pad. VITAL OXIDE must come in contact with the cause of the odor to be effective.

TO DEODORIZE HVAC System Ductwork: Spray full strength product into all system intake vents while system fan is running. Turn off Heat or Cool demand. Allow enough spray time for Product to contact air duct system surfaces, Repeat application as necessary. Electrostatic spray application is the most effective method, however, all spray methods will work.

Hospitals/Healthcare Facilities:

VITAL OXIDE cleans, disinfects and deodorizes hard, nonporous hospital and medical surfaces in one step with no rinsing required. VITAL OXIDE is a one step germicidal disinfectant cleaner and deodorant designed for general cleaning, and disinfecting of hard, nonporous inanimate surfaces. Removes dirt, grime, fungus, mold, food residue, blood and other organic matter commonly found in hospitals and in health care facilities. It also eliminates odors leaving restroom surfaces smelling clean and fresh. Use where odors are a problem. This product may be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization of high level disinfection.

***This product is not to be used as a terminal sterilant/high level disinfectant on any surface of instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contact intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body.*

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATIONS AGAINST HIV-1, HBV, and HCV ON SURFACES/ OBJECTS SOILED WITH BLOOD/BODY FLUIDS KILLS HIV-1, HBV, AND HCV ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS in health care settings or other settings in which there is expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids and surfaces/ objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS), and Human Hepatitis A, B and C Virus.

When handling items soiled with blood or body fluids use disposable latex gloves, gowns, masks, or eye coverings.

DISPOSAL OF INFECTIOUS MATERIALS: Blood and other body fluids should be autoclaved and disposed of according to Federal, State, and local regulations for infectious waste disposal.

CONTACT TIME: Allow surfaces to remain wet for 5 minutes for virus inactivation - 10 minutes for bacteria disinfection.

To Clean:

Pre-Cleaning Instructions for Non-Porous Surfaces: Spray VITAL OXIDE straight onto soils, scrub and wipe clean with a dry paper towel or cloth. For spot cleaning non-porous surfaces, spray and wipe clean with damp sponge -or- mop or cloth.

For Cleaning Floors: Add one cup of VITAL OXIDE per gallon of water in bucket and clean with sponge, mop, or pad.

To Spot Clean Carpet and Fabrics: Mix 1 part product to 5 parts tap water. Spray on soiled area until wet. Gently blot area with a clean, damp, color safe cloth. DO NOT RUB. Repeat as needed for stubborn stains. Let air dry. (Always test for colorfastness)

To Use As A PreCleaner Or PostCleaner: Spray a light even coating over soiled area (until wet). Allow to remain wet for 60 minutes. Deep clean following your machine's guide.

Allergen Removal: To reduce specified allergens: Spray, wait 1 minute, and wipe excess. Allow to air dry.

STORAGE AND DISPOSAL: Store in original closed container in a cool, dry, place away from heat and open flame. Do not allow product to become overheated in storage. Avoid prolonged storage temperature above 40°C, 90°F. This may cause increased degradation of the product, which will decrease product effectiveness.

Non-refillable -or- Refill only with this product. Do not reuse or refill container unless the directions for use allow a different (concentrated) product to be diluted in the container.

Container Disposal: Rinse and offer empty container for recycling. If recycling is not available, discard container in trash.

Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Discard excess or used (product) solution in drain with running water.
